# what is examinlab

## A cloud-based solution for the assessment of language and professional skills

ExaminLab is an online platform that allows you to measure the linguistic and professional skills of your candidates and employees by means of tests based on “CAT” technology: Computerised Adaptive Tests.

Born from the collaboration between Arca24 and British Language Centre, a company specialising in languages and vocational training, ExaminLab allows several candidates to be assessed at the same time, by sending them a simple email with the link to take the test, which can be done remotely from any device.

## test library

### international languages (6 tests)

Tests designed to assess the level of knowledge of international languages (English, French, Italian, German, Spanish, Portuguese).

### non-european languages (4 tests)

Tests designed to assess the level of knowledge of non-European languages (Chinese, Japanese, Arabic and Russian).

### business languages (3 tests)

Tests designed to assess the level of knowledge of business languages of candidates and employees, indicating the actual level of competence (English, French and German)

### specialist (2 tests)

Tests designed to examine the level of knowledge of candidates and employees in two different categories: basic computer skills (Word, Excel, PowerPoint, Mailbox tools, ecc...) and accounting.

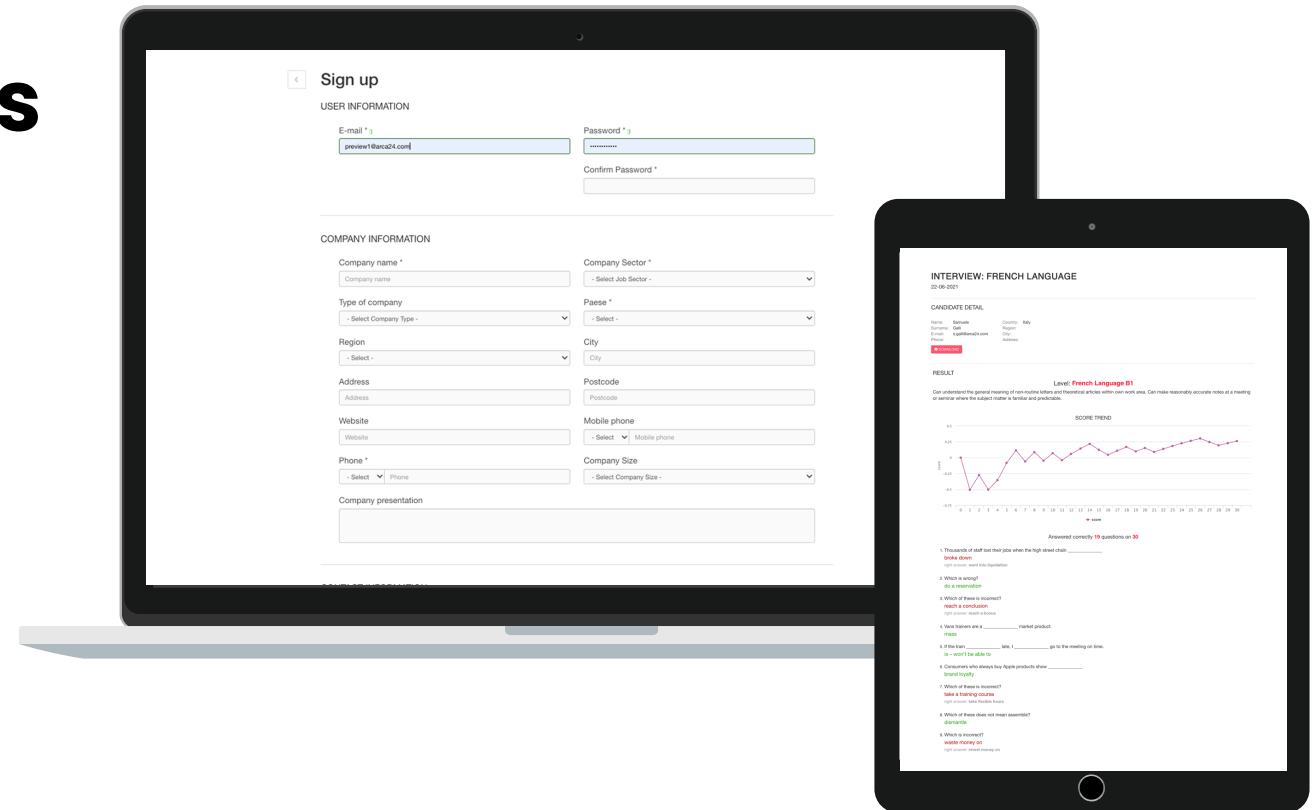

## International languages

### 6 language proficiency tests

Tests designed to assess the level of knowledge of international languages (English, French, Italian, German, Spanish, Portuguese) of candidates and employees, indicating the actual level of competence (A1, A2, B1, B2, C1, C2).

- 6 available tests
- 25 minutes – average test duration
- 6 levels

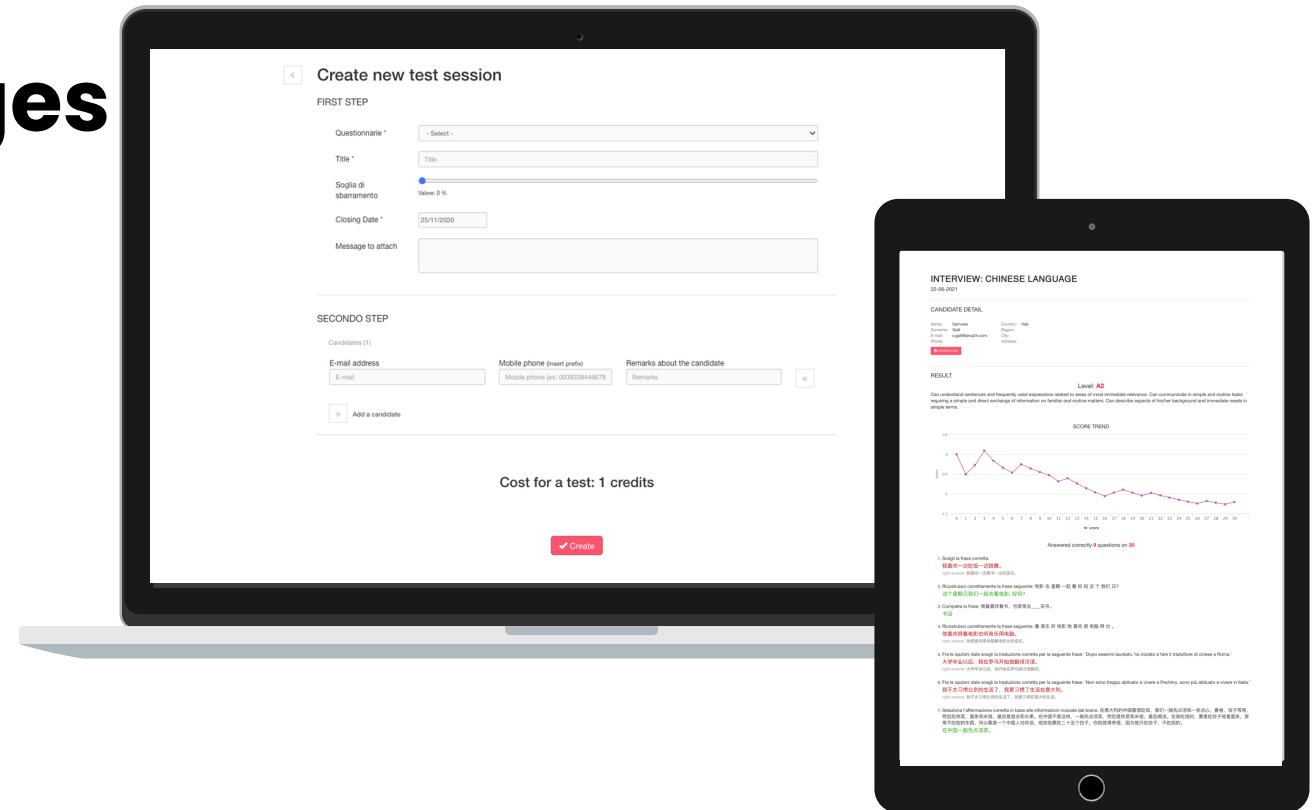

## non-european languages

### 4 language proficiency tests

Tests designed to assess the level of knowledge of non-European languages (**Chinese, Japanese, Arabic and Russian**) of candidates and employees, indicating the actual level of competence (A1, A2, B1, B2, C1, C2).

- 4 available tests
- 25 minutes – average test duration
- 6 levels

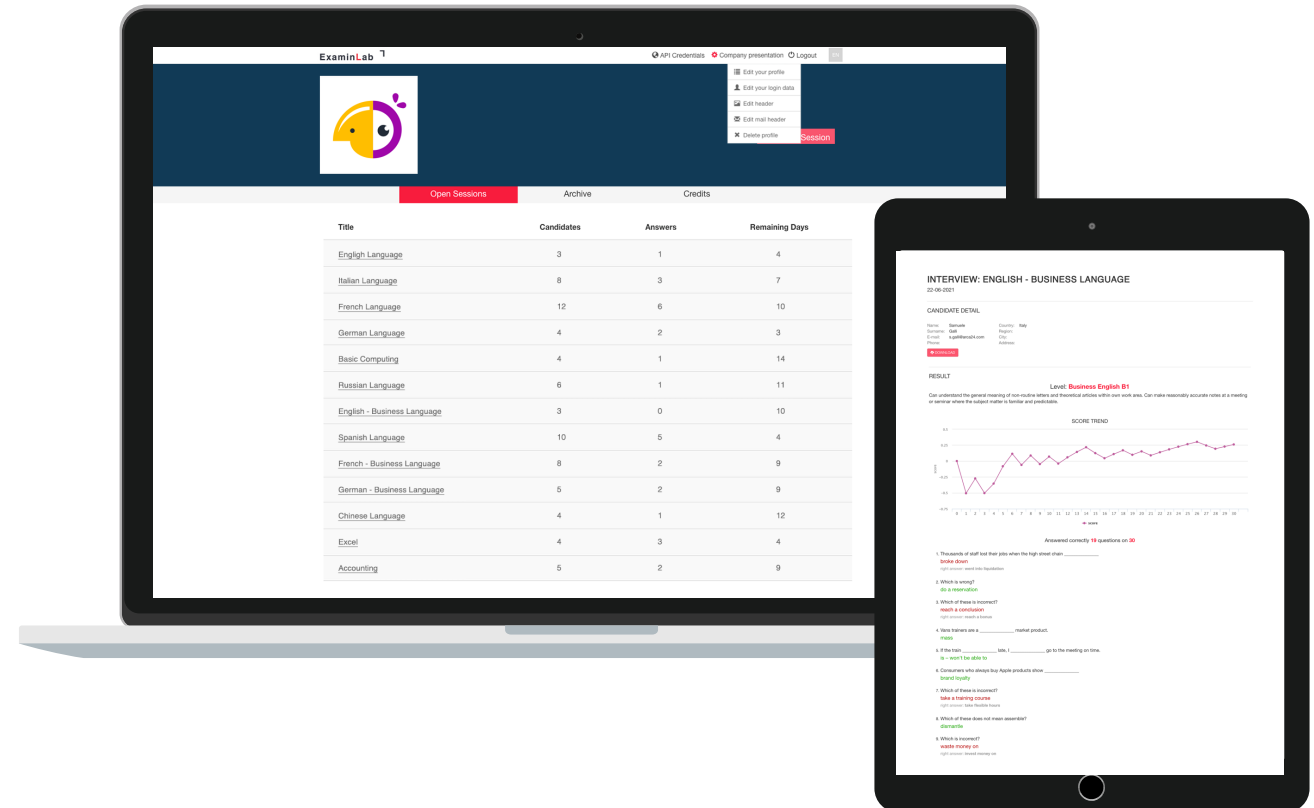

## business languages

### 3 language proficiency tests

Tests designed to assess the level of knowledge of business languages of candidates and employees, indicating the actual level of competence (A2, B1, B2, C1).

- 3 available tests
- 25 minutes – average test duration
- 4 levels

## specialist

### 2 language proficiency tests

Specialist tests have been created by highly qualified university professors with several years experience.

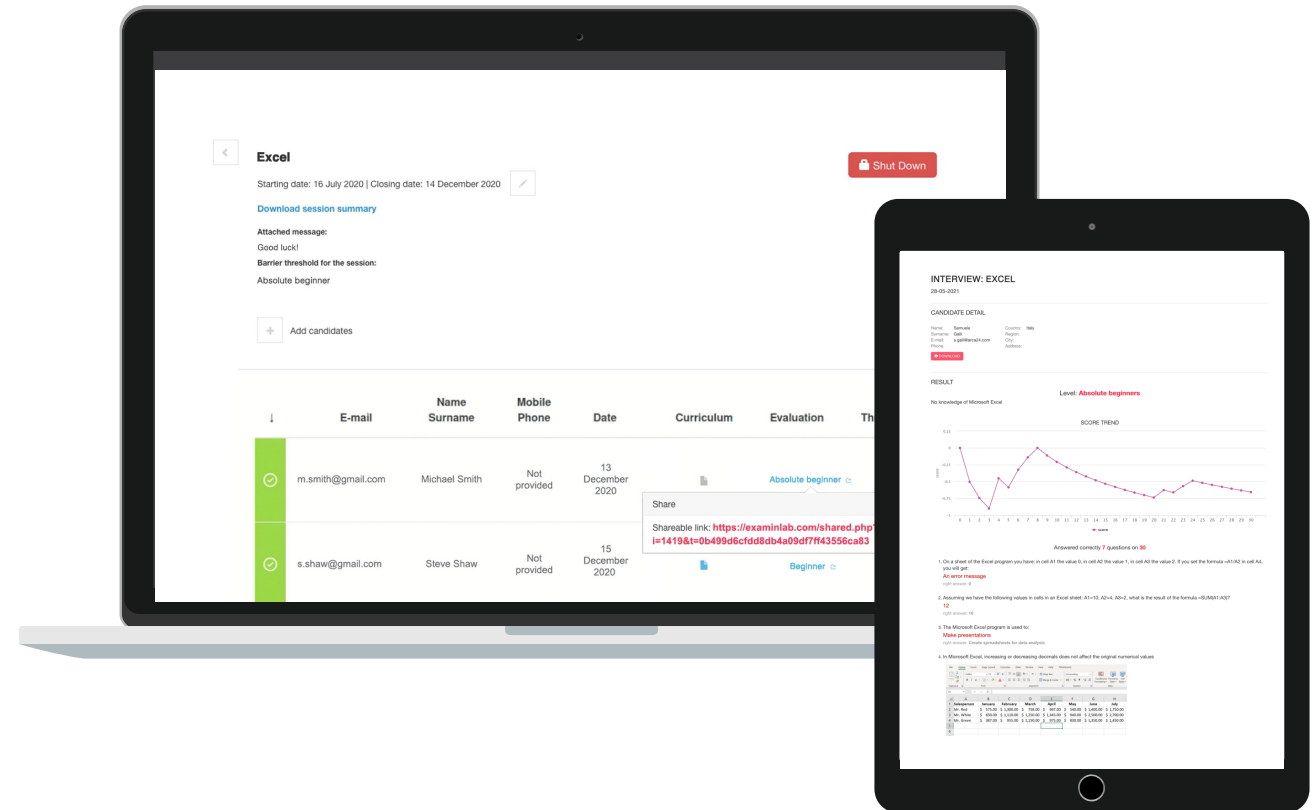

Therefore those tests are very practical and have been developed with the aim of testing the actual competencies and skills of the examinees contextualized to everyday work.

**Office** (use of Word, Excel, PowerPoint, Mailbox tools, ecc...):

- 3 levels
- 40 minutes – average test duration

**Accounting** (assessment of administrative accounting skills):

- 6 levels
- 30 minutes – average test duration

# why examinlab

## integrated e-commerce system

You can purchase credits or activate a standard or customized subscription for the creation of new test sessions within the platform.

## qualified adaptive tests

The platform was born from the collaboration between Arca24 and British Language Centre (a company specializing in language and vocational training).

## API integration

Easy connection with enterprise applications.

## clear results

The platform returns results that are easy to understand, even by non-specialized personnel.

## uniqueness of the tests provided

The database of quizzes from which the platform draws is constantly updated and the tests requested to the candidate by the system are different each time, which guarantees their uniqueness.

## simple administration

Within the system, emails can be sent to candidates with a link to take the test.

## how it works

### 1. company registration and login

In [this section](#) you can create your company profile by filling in a simple registration form where you will be asked to provide your access data to the platform as a recruiter and your company information. For subsequent accesses you will simply have to enter your credentials directly on the [login page](#).

### 3. open sessions management

Within this section you can find all open test sessions, with details of the total number of candidates and/or employees who have been invited to take the tests. You can even see how many of these have already answered the tests and the days remaining until the session closes.

### 2. create a new test session

For creating a new test session you have to: select the test, assign a title to the session and define a closing date and enter the email addresses of the profiles you wish to interview. and, The system will send the contacts entered an invitation to take the assessment test.

### 4. results analysis

By clicking on the title of each session, you have access to all the details: closing date and list of candidates who have completed the test. You can also add new candidates. In addition, the platform offers the possibility to share test results externally by sending a simple link.
